

Publikace Katedry logiky přibližně od r. 2007, říjen 2014

Na seznamu je 62 položek, 15 z poslední doby přiřazených VVZ/PRVOUK je vyznačeno. Zvláště významných publikací, které vyšly v důležitých světových časopisech, v prestižním sborníku AiML a kniha v nakladatelství Springer, je 25. Z toho je přibližně 5 takových, kde velmi významný logik (Shelah, Visser, de Jongh, Magidor, Grzegorzcyk) je spoluautorem, nebo příslušný článek cituje, nebo onen článek odpovídá na otázku, kterou takový logik položil.

Seznam položek

- [Ara13] P. Arazim. Pluralism in geometry. *AUC Philosophica et Historica, Miscellanea Logica IX*, 2/2010:7–21, 2013. PRVOUK P13.
- [Bíl07] M. Bílková. Uniform interpolation and propositional quantifiers in modal logics. *Studia Logica*, 85(1):1–31, 2007. DOI 10.1007/s11225-007-9021-5. IF 0.342 (2012).
- [Bíl08] M. Bílková. Normal forms, distributive laws, and uniform interpolants. In M. Bílková, editor, *Consequence, Inference, Structure: Miscellanea Logica VII*, pages 53–88. Faculty of Arts, Charles University in Prague, 2008. ISBN 978-80-7308-261-1. URL <http://www.logika.ff.cuni.cz/papers/misclogVII.pdf>.
- [BMPR10] M. Bílková, O. Majer, M. Peliš, and G. Restall. Relevant agents. In L. Beklemishev, V. Goranko, and V. Shehtman, editors, *Advances in Modal Logic 8*, pages 22–38, Moscow, Russia, August 2010. College Publications. URL <http://www.aiml.net/volumes/volume8/>.
- [BdJJ09] M. Bílková, D. H. J. de Jongh, and J. J. Joosten. Interpretability in PRA. *Ann. Pure Appl. Logic*, 161(2):128–138, 2009. IF 0.722 (2012).
- [BMP14] M. Bílková, O. Majer, and M. Peliš. Epistemic logic for skeptical agents. *J. Logic Computation*, 2014. Submitted, probably accepted. PRVOUK P13. IF 0.504 (2014).
- [BPV08] M. Bílková, A. Palmigiano, and Y. Venema. Proof systems for the coalgebraic cover modality. In C. Areces and R. Goldblatt, editors, *Advances in Modal Logic 7*, pages 1–21, Nancy, France, September 2008. College Publications. URL <http://www.aiml.net/volumes/volume7/>.
- [BPV14] M. Bílková, A. Palmigiano, and Y. Venema. Proof systems for Moss' coalgebraic logic. *Theoretical Computer Science*, 549:36–60, 2014. DOI 10.1016/j.tcs.2014.06.018. PRVOUK P13. IF 0.516 (2014).
- [BVV11] M. Bílková, J. Velebil, and Y. Venema. On monotone modalities and adjointness. *Math. Struct. Comp. Sci.*, 21(2):383–416, 2011. DOI 10.1017/S0960129510000514. IF 0.504 (2012).
- [Chv12] K. Chvalovský. On the independence of axioms in BL and MTL. *Fuzzy Sets and Systems*, 197:123–129, 2012. DOI 10.1016/j.fss.2011.10.018. IF 1.759 (2011).

- [ND13] J. Nešetřil and V. Douchová. S. Zeki and neuroaesthetics—a possible framework to objectify aesthetics. *AUC Philosophica et Historica, Miscellanea Logica IX*, 2/2010:23–33, 2013. PRVOUK P13.
- [HF12] R. Honzík and S. D. Friedman. Supercompactness and failure of GCH. *Fundamenta Mathematicae*, 219(1):15–36, 2012. DOI 10.4064/fm219-1-2. IF 0.529 (2014).
- [HFZ13] R. Honzík, S. D. Friedman, and L. Zdomskyy. Fusion and large cardinal preservation. *Ann. Pure Appl. Logic*, 164:1247–73, 2013. IF 0.722 (2012).
- [Hon08] R. Honzík. Quick guide to independence results in set theory. In *Consequence, Inference, Structure: Miscellanea Logica VII*, pages 89–131. Faculty of Arts, Charles University in Prague, 2008. ISBN 978-80-7308-261-1. URL <http://www.logika.ff.cuni.cz/papers/misclogVII.pdf>.
- [Hon10a] R. Honzík. A characterization of lifting generics for Sacks-like forcings. *AUC Mathematica et Physica*, 51:49–55, 2010. ISSN 0001-7140.
- [Hon10b] R. Honzík. Global singularization and the failure of SCH. *Ann. Pure Appl. Logic*, 161(7):895–915, 2010. DOI 10.1016/j.apal.2009.11.002. IF 0.722 (2012).
- [Hon13] R. Honzík. Large cardinals and the continuum hypothesis. *AUC Philosophica et Historica, Miscellanea Logica IX*, 2/2010:35–52, 2013. PRVOUK P13.
- [HV] R. Honzík and J. Verner. A lifting argument for the generalized Grigorieff forcing. In November 2013 accepted for publication in Notre Dame J. Formal Logic. PRVOUK P13. IF 0.333 (2014).
- [CFH14] B. Cody, S. D. Friedman, and R. Honzík. Easton function and supercompactness. *Fundamenta Mathematicae*, 226:279–296, 2014. PRVOUK P13. IF 0.529 (2014).
- [FH08] S. D. Friedman and R. Honzík. Easton’s theorem and large cardinals. *Ann. Pure Appl. Logic*, 154(3):191–208, 2008. IF 0.722 (2012).
- [FH12a] S. D. Friedman and R. Honzík. A definable failure of the Singular Cardinal Hypothesis. *Israel J. Math.*, 192(2):719–762, 2012. DOI 10.1007/s11856-012-0044-x. IF 0.659 (2013).
- [FH12b] S. D. Friedman and R. Honzík. Easton’s theorem and large cardinals from the optimal hypothesis. *Ann. Pure Appl. Logic*, 163(12):1738–1747, 2012. The first author was supported by FWF Project #P20835-N13. The second author was supported by postdoctoral grant GAČR #201/09/P115. DOI 10.1016/j.apal.2012.04.002. IF 0.722 (2012).
- [FH] S. D. Friedman and R. Honzík. The tree property at the \aleph_{2n} ’s and the failure of SCH at \aleph_ω . Accepted for publication in *Ann. Pure Appl. Logic*. PRVOUK P13. IF 0.722 (2012).
- [Hor14] A. Horská. *Where is the Gödel-point hiding: Gentzen’s Consistency Proof of 1936 and His Representation of Constructive Ordinals*. SpringerBriefs in Philosophy. Springer, 2014. ISBN: 978-3-319-02170-6 (Print) 978-3-319-02171-3 (Online). DOI 10.1007/978-3-319-02171-3. PRVOUK P13.
